

# COVID-19: What You Need to Know

## What is SARS-CoV-2 (COVID-19)?

It is a new strain of Coronavirus that had not been previously found in humans. It affects the respiratory tract and most people experience mild symptoms, although for older people and those with underlying medical conditions (such as high blood pressure, heart problems or diabetes), it can be severe and even fatal.

### ▶ What are the symptoms?

- Fever
- Cough
- Shortness of breath
- Breathing difficulties
- Fatigue

### ▶ How long can COVID-19 live on a surface?

COVID-19 can live on surfaces from several hours to 7 days (stainless steel & plastic)

### ▶ How can I prevent or protect others from COVID-19?

- Wash your hands often with soap & water for at least 60 seconds
- Avoid touching your eyes, nose, or mouth with unwashed hands
- Clean and disinfect frequently touched surfaces.
- Avoid close contact with others, especially those who are sick
- Stay home when you have cold like symptoms

### ▶ How can I get it?

- Coughing and sneezing without covering the mouth can disperse droplets into the air, spreading the virus
- Touching or shaking hands with a person that has the virus can pass the virus from one person to another
- Making contact with a surface or object that has the virus and then touching your nose, eyes, or mouth
- COVID-19 may spread through contact with feces

Coronaviruses are large enveloped viruses. Both PUR-ONE and PURTABS kill similar viruses and therefore can be used to effectively kill COVID-19 on hard surfaces when used in accordance with directions for use against Norovirus on hard porous/non-porous surfaces.

For additional information, refer to the CDC website at <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cleaning-disinfection.html>

## PURTABS and PUR-ONE tablets are EPA List N disinfectants effective against COVID-19.

- Concentrated effervescent tablet for accurate dilution (ppm) every time.
- Neutral pH – not caustic or corrosive to surfaces
- NFPA rating 0,0,0 for Use Dilution

# Cleaning & Disinfecting with Evaclean

**PUR·ONE**  
EFFERVESCENT CLEANER & DISINFECTANT TABLETS

**PURTABS**  
EFFERVESCENT SANITIZING / DISINFECTION TABLETS

Ensure that all environmental cleaning and disinfection procedures are followed consistently and correctly. Thorough cleaning of environmental surfaces with PUR·ONE and applying PURTABS as a disinfectant is an effective and sufficient procedure.

STEP 1: CLEAN	STEP 2: DISINFECT					
Clean all surfaces, including floors, with PUR·ONE using microfiber cloths and flat mops.	Disinfect all surfaces using the Protexus sprayer and PURTABS for enhanced touchless disinfection.
